Memory Support

The X10SLQ supports up to 32 GB of Unbuffered (UDIMM) DDR3 Non-ECC 1600/1333 MHz in 4 memory slots. Populating these DIMM slots with a pair of memory modules of the same type and same size will result in interleaved memory, which will improve memory performance.

The X10SLQ-L supports up to 16 GB of Unbuffered (UDIMM) DDR3 Non-ECC 1600/1333 MHz in 2 memory slots. Populating these DIMM slots with a pair of memory modules of the same type and same size will result in interleaved memory, which will improve memory performance.

DIMM Memory Installation

Insert the desired number of DIMMs into the memory slots, starting with DIMMA2.
